

🔧 PCS7 TurboSift – User Manual

Welcome to **PCS7 TurboSift**, a secure, license-based Excel and CSV data filtering and comparison tool developed by **Consulta Technologies Pvt. Ltd.**

🔑 Login and Access

1. Launch the App

- Open the application (e.g., Streamlit web app or executable).
- You will see the **Login Page**.

2. User Credentials

Username	Password
DEMO	Demo@123 (User)

🔑 License Activation (For Non-Admin Users)

1. Log in with your credentials.
 2. If the license is not active, upload the `activation_key.json` license file.
 3. Once activated, license details and expiry info will be displayed.
-

🧰 Available Tools

Your license controls which tools you can access:

Tool 1 – Single File Filter

Purpose: Filter a single CSV or Excel file by specific column values.

How to Use:

1. Upload your CSV or Excel file.
 2. If Excel, select the sheet.
 3. Select the column to filter.
 4. Enter filter values (comma separated).
 5. Select columns to display in output.
 6. Click **Apply Filter** to see filtered results.
-

Tool 2 – Dual File Filter

Purpose: Filter data in the second Excel sheet based on values in the first Excel sheet.

How to Use:

1. Upload two Excel files.
 2. Select sheets from each file.
 3. Select the filter columns from Sheet1 and Sheet2.
 4. Choose filter mode: **Starts With** or **Contains**.
 5. Optionally, apply an additional filter on Sheet2.
 6. Select output columns.
 7. Click **Apply All Filters**.
 8. Download filtered results as CSV.
-

Tool 3 – Exact Match Comparator

Purpose: Compare two Excel sheets and find rows with exact or case-insensitive matches in specified columns.

How to Use:

1. Upload two Excel files.
 2. Select sheets and columns for comparison.
 3. Choose match type: **Exact Match** or **Case-insensitive Match**.
 4. View matched rows.
 5. Select columns from both files to include in output.
 6. Download matched results as CSV.
-

Additional Post-Processing Instructions for Tool 3 Output

After downloading the output file from Tool 3:

1. Open the CSV output in Excel.
 2. **Duplicate the process tag column:**
 - Identify the process tag column (e.g., **F1_ProcessTag**).
 - Copy it to a new column named something like **F1_ProcessTag_Duplicate**.
 3. **Apply Deadline Filter:**
 - Use Excel's built-in filter to filter rows based on the **Deadline** column or other date/time columns.
 - Combine deadline filtering with other filters (e.g., status, tag values) to analyze data effectively.
 4. This helps analyze process tags in relation to deadlines and other parameters.
-

Tool 4 – Contains Match Comparator

Purpose: Find partial matches where values from one Excel file appear as substrings in another.

How to Use:

1. Upload two Excel files.
2. Select sheets and columns for partial comparison.
3. Tool finds all rows in File 2 where the selected column contains any value from File 1.
4. Select output columns.

5. View and download matched rows as CSV.

Logout

- Click the Logout button (top right) to end your session and return to the login screen.
